Finger Eleven, Good Times

Something has stuck in Underneath my skin Eyes all looking in For something within Somewhere in here

Now everything I say Gives this all away Senses deadened again Nothing lives today Not in here

Here in your head

Careful what you're feeling
On the inside
You should try to remember
The good times and the high life
Are you feeling alright?

Felt that I belonged And now I feel that gone Where it all went wrong I traced it all along Back here again

There was something calling me To negativity Dark covering me Shrouding every scene I'm cast in

Careful what you're feeling
On the inside
You should try to remember
The good times and the high life
Are you feeling alright?

Careful when you're feeling
Out of your mind
You should try to remember
The strong lines in the spotlight
Till you're feeling alright

Please answer
I'm calling just to find out
If you could be here
For me when I crack
The answer came
I found it buried in
The trash there
I saw it stare

Careful what you're feeling
On the inside
You should try to remember
The good times and the high life
Are you feeling alright?

Careful when you're feeling
Out of your mind
You should try to remember
The strong lines in the spotlight
Till you're feeling alright
