

Finger Eleven, Turns Me Back(Halflife)

I need more than me
Keep you wanting faithfully
Faith my best sad face
Turns so slowly into place

And in all ways
Turns Me Back

More than forces through
Shows my bedside split in two
We are once wasn't there
In the state of nows been there

But in all ways
Turns Me Back

And in all ways
Turns me

Can't forget it while we're waiting
We will see for all that's been pain
See the day We will be
Always watching we keep turning back

Turn Away

You can call me fine
You find your rights I need mine
We will feel no pain
We come up from down again

But in all ways
Turns Me Back

And all ways
Turn Me Back
