

# Fireflight, Myself

You turned a page, inside my heart,  
Brought the light when my world was so dark  
I feel something I cant explain  
You consumed me and took on my shame

PreChrs:

Everything is gone that held me down,  
Your arms are around me  
All the pain has left my selfish heart,  
And Your love it surrounds me

Chorus

You woke me up and made me learn to love more than myself  
You took my hand before I knew there was more than myself

Eyes opened wide, I see your face  
For the first time Im not in my way  
A love like I have never known  
A veil is lifted, now Im not alone

Bridge

Now that I know, Ive finally found my home  
This life is not my own  
Whatever we go through  
I will follow you
