

Flickerstick, Lift

Lift up your head
Focus on every detail
Why does this illusion
Bring so much confusion
When all I can dream of is you?
Lift up your head
We're rising with every breath
A liquid solution, a chemical fusion
And all I can dream of is you

Constantly feeling the earth spinning around
But I'm standing alone
With you I see stars in your eyes
In a trance I'm so high
With you I survive
Let's get away now

Imagine there's no one around
Imagine you're not just a face in the crowd
There's a new set of rules
No more pain or confusion
You're numb to the world that you know
I'm constantly feeling
Like nothing's bringing me down
'Cause you're always around
With you I see stars in your eyes
In a trance we're alive
Ten feet off of the ground
Let's turn it up now

I got you
I got you
I got you
It's ready for you

Lift up your head
It's amazing where everyone
Goes in the end
Why does this illusion
Bring so much confusion
When all I can dream of is you?

I'm on the ground
I'm off the ground
Ten feet off (when I'm with you)
Ten feet off (when I'm with you)

I could be true with you
I could be through with you

Don't you get it? We're alive
Completely out of sight
We're running out of time
With love we can survive

Don't you get it we're alive
Completely out of sight
With love we will survive
