

# Flip, Away From The Sun

Here we come nothing's gonna move us  
Rather jump than take the fall  
Inside the anger I've got for your life  
Outside the fear you've got for us  
Where we step won't be grass again  
It'll be burned with our inner strength  
You're suffocated with this nasty smoke  
No one comes to water the flames

Nothing will take us away from the sun (HEY!!!)  
No one will take us away from the sun (HEY!!!)

You're feeling safe & secure  
It happens only in your head  
You wish that I loose control  
I just wish that you were dead

Covered with ashes from another time  
Removed that shell and saw light  
You couldn't open your arms at last  
You couldn't reach that precious light  
Spent your life running for your money  
Trying to fulfill of comfort your hands  
People like you doesn't deserve to live  
I'm gonna make shorter your life

Nothing will take us away from the sun (HEY!!!)  
No one will take us away from the sun (HEY!!!)
