

For Stars, Only Star

You are the only star
You are the place that spaceships only dream of
You are the place that people say they've been
But I don't know
I've never seen one
Sometimes I want to be one
I'll travel far for you

You are the only storm
You are the one who makes it all so hard
You are the one who makes it seem so green
And I don't know
If I can get through
I always want to see you
You make things good for me

You are the only star
You are the place that spaceships only dream of
You are the place that people say they've been
But I don't know
I've never seen one
I often I want to be one
I'll go so far for you
