

Forty Deuce, Start It Up

I do a little bit and try to quit but damage done
I'm too far gone
I'm doing everything I wanna do
So how you gonna tell me it's wrong?

From the tip of my toes to the rush sent to my head
It's a feeling I know I'll never feel again

Start it up, start it up start it up let it go
Start it up, start it up till your body says no!
Start it up, start it up start it up let it go
Start it up, start it up till your body says no!

I am unaffected for a second but the second goes on too long
I feel neglected and rejected but then suddenly I fell so
strong
And I can't get away from myself long enough to be saved
So I take what you give and you tell me I am ok

Start it up, start it up start it up let it go
Start it up, start it up till your body says no!
Start it up, start it up start it up let it go
Start it up, start it up till your body says no!

So I take what you give and you tell me I am ok

Start it up, start it up start it up let it go
Start it up, start it up till your body says no!
Start it up, start it up start it up let it go
Start it up, start it up till your body says no!
