

Fragma, Free Your Mind

I've seen you standing right in front of me
I've seen you dreaming 'bout a world that's meant to be
I've heard you talking to me constantly
You're eyes were gleaming and I long to feel you close to me

Free your mind
Cross that line
We can take a trip to nowhere see what we can find

Free your mind
Take your time
We can make it if we try we'll leave it all behind

I watched you defend your foolish pride
I watched you sleeping and I held you through the night
I can't let go, you're overwhelming me
Secrets we're keeping make your arms the place to be

Free your mind
Cross that line
We can take a trip to nowhere see what we can find

Free your mind
Take your time
We can make it if we try we'll leave it all behind
