

Frankenstein Drag Queens From Planet 13, The

On the rocketship Oddity 13
Where the strange can change
Into stranger things
I command the stars to fall for me
All aboard the rocketship Oddity 13

The rocketship soars through space
For every star there is a scar on my face
No longer part of the human race
There is no planet Earth in my outer space

The stars form in a perfect line
There is nothing left behind
The Oddity has taken flight
I'm so star struck tonight
