

# Frankenstein Drag Queens From Planet 13, The

On the rocketship Oddity 13  
Where the strange can change  
Into stranger things  
I command the stars to fall for me  
All aboard the rocketship Oddity 13

The rocketship soars through space  
For every star there is a scar on my face  
No longer part of the human race  
There is no planet Earth in my outer space

The stars form in a perfect line  
There is nothing left behind  
The Oddity has taken flight  
I'm so star struck tonight
