

Fred Ventura, The Years

Hit the streets, alright
Hit the streets, alright

Down, deep inside the emotions of your heart
There is something difficult to start
When the daylight comes to an end

So you fall down
Never looking upwards at the sky
Always looking back to your wild days
When you were alone in the dark

Don't close your eyes
It's time to stop wasting your life
Because as time goes by
The years go by without you

REFRAIN:
Alone tonight
Live on, hit the streets, alright
Alone tonight
Alone till the morning light

Hit the streets, alright
Hit the streets, alright

Look at the world that's run away from you
The people that never smile at you
'cause you want to be the only one

Don't close your eyes
It's time to stop wasting your life
Because as time goes by
The years go by without you

Alone tonight
Live on, hit the streets, alright
Alone tonight
Alone till the morning light

Alone tonight
Live on, hit the streets, alright
Alone tonight
Alone till the morning light

Hit the streets, alright
Hit the streets, alright
