

# Fred Ventura, The Years

Hit the streets, alright  
Hit the streets, alright

Down, deep inside the emotions of your heart  
There is something difficult to start  
When the daylight comes to an end

So you fall down  
Never looking upwards at the sky  
Always looking back to your wild days  
When you were alone in the dark

Don't close your eyes  
It's time to stop wasting your life  
Because as time goes by  
The years go by without you

REFRAIN:  
Alone tonight  
Live on, hit the streets, alright  
Alone tonight  
Alone till the morning light

Hit the streets, alright  
Hit the streets, alright

Look at the world that's run away from you  
The people that never smile at you  
'cause you want to be the only one

Don't close your eyes  
It's time to stop wasting your life  
Because as time goes by  
The years go by without you

Alone tonight  
Live on, hit the streets, alright  
Alone tonight  
Alone till the morning light

Alone tonight  
Live on, hit the streets, alright  
Alone tonight  
Alone till the morning light

Hit the streets, alright  
Hit the streets, alright
