

Free For Fever, Leave Me Alone

Hey, what you say

You was talking about a future including you and me

Hey, hear me say

There won't be no future involving you and me

Hey what you say

You was talking about a future including you and me

Hey hey, hear me say

The big thing that we scared about

We make nightmares about

Is being in a love affair forever

The real thing taht they want so far

More than papa's new car

Is being in a love affair forever

I met your papa, your mama

Your brother and sister

I wish I was a dogshit on their shoes and watch their mug

Your grandpa, your grandma, uncle and aunt sue

Too many monkey in your zoo

Won't be your devolution man

Leave me alone

Leave me alone

The deep thing that I dream about

The one that makes no doubt

Is to get down on the road with all my fellas

Real love baby it's not lie, just need a multiply

Let's have what we can't get fighting together

And if you really want to shock me, really want to funk me

Just forget about your ma and pa forever

They're just so snobby, can't you see?

They don't love you at all

I know you can trust me, so

Please leave me the f**k alone

I hate you to love you so

I lose control, it's time to let me go

Leave me alone

Leave me alone
