

Front Line Assembly, Civilization

we fight
we rule
don't will to conquer
symbols of depression
like borders obsolete
eradicate exterminate all
species from the earth
in the name of progress
we call peace

These Islands collapsing
we burn, we rape, obliterate
our conscience heavy
we take and take....

the silence collapsing

no turning back
the damage is done
you can't choose life
no will to run

These Islands collapsing
we burn, we rape, obliterate
our conscience heavy
we take and take....

the silence collapsing

no turning back
the damage is done
you can't change life
no will to run

freedom isn't freedom isn't freedom isn't freedom isn't ...

these Islands collapsing

we burn, we rape, obliterate
our conscience heavy
we take and take....

these Islands collapsing

no turning back
the damage is done
you can't choose life
no will to run

these Islands collapsing
