

# Fugazi, Argument

When they start falling executions will commence  
Sides will not matter now matter makes no sense  
How did a difference become a disease?  
I'm sure you have reasons a rational defense  
Weapons and motives bloody fingerprints  
But I can't help thinking it's still all disease  
Here comes the argument  
Folderol it's all about strikes now  
So here's what's striking me  
That some punk could argue some moral abc's  
When people are catching what bombers release  
I'm on a mission to never agree here comes the argument  
Here comes the argument here comes the argument here it comes
