

Fully Down, We Love To Know We're Not Alone

We are the ones
We are the free
Let's separate them from ourselves
It's our disease
It's the poison running through my veins

The gun is loaded for you
Don't cry for me
Don't cry for me
Everything is, everything is okay now

You can take all of me
And if you do
You'll feel it everytime I breathe
London's calling you tonight
Don't wonder
I'll wait for you

We are the young
What we believe it separates us from their dreams
It's our disease
It's the drug that makes our hearts beat faster

What would you say if I wrote this for you?
What would you say if I told you that I care?
Everything is, everything is just fine

You can take all of me
And if you do
You'll feel it every time I breathe
London's calling you tonight
Don't wonder
I'll wait

I've been calling you all night
Don't wonder
I'll wait for...

The gun is loaded for you
What would you say if I told you that I care?
I f**king wrote this for you
Everything is,
Everything is just fine.
