

# Gabrielle, Over You

From the moment that we met  
I knew that we would connect  
Your eyes had told me that somehow  
We shared a history  
Feeling fearless I took a chance  
Couldn't let the moment pass  
I felt that fate had played a hand  
And brought you here to me

But happiness can be short-lived  
And pain can bring you to your knees

[Chorus:]  
Don't think, that I'll get over you  
Don't know, if I can make it through  
My darkest days without you in my life and i  
Don't think, that I can face the pain  
I'll never see your face again  
I close my eyes and wonder when  
Will it ever end

Get as close as we could be  
Felt that you could see through me  
You read my mind you knew my life  
Became a part of me  
Took for granted precious time  
Thought we had it on our side  
By some cruel twist of fate  
I had to watch you fade away

[Chorus]
