

# Gang Starr, Execution Of A Chump (No More Mr.

I knew this chump see... he tried to play me  
He was my right hand man, but he betrayed me  
I let him chill at my crib, cause we were down and  
I went to work everyday while he was loungin  
He tried to backstab, he kept on jokin  
He didn't know he could've got his back broken  
I had to cut homeboy off for even tryin that  
His game was mad weak, know what I'm sayin black?  
Stepped to him quietly, he copped a plea  
Told him to fix it or I'd have to catch a body  
In this society, there's many snakes  
Don't be too eager when you're seeking a break  
Cause chumps will exploit, use you to benefit  
So just be keen and, learn all the ins of it  
I've had my share, of dealing with fake men  
I left them squealing, "It was I who did the taking"  
Proceeding exactly, according to plan  
I foiled the scheme cause it seemed I was that man  
And if you step up like the kid who did front  
You will bear witness... the execution of a chump

Now, now... let's get the purpose of it  
I'm snatchin hearts out of chumps, cause I deserve to love it  
Observin acts of a snake, while I evaluate  
Eliminate the nucleus, I'm doin this  
Pissed usin fists usin force of any sort  
My conscience says it's nonsense, if I put up with it  
It meaning sleazy, sorry-type slick types  
I'll drive em all to danger, and make em hitchhike  
Cause if you step up like the kid who did front  
You will bear witness... the execution of a chump

Call me the Guru... known as a spiritual teacher  
I'll reach you deftly, directly, correctly so select me  
Elect me as your prophet and we'll praise him as I drop it  
Pursue this, review this, I knowledge more than buddhist monks, punk  
I'll wreck the set and grab a big chunk  
Known to be a wise one, known to be a seeker  
Following my calling in life, so I can keep the  
minds in line to find devine designs of rhyme  
Rewind this on your box one time  
But if you step up like the kid who did front  
You will bear witness... the execution of a chump
