

# Gareth Gates, I Love You

I was looking for a new direction  
You got to keep moving for your own protection  
Now that kind of love just ain't enough  
You turn the tables on my whole world baby  
You take away all the heartache bad love gave me  
Can't you see what you've done in my life?  
And make that pure connection  
Changed my whole perception of love

You're the fuel in my fire  
my fever burns high  
Don't be scared of desire; it's a good thing

When we come together, you can't stop this good thing  
No you can't put it out  
When we come together, try to stop this good thing  
And it will burn you down

I'm kinda warming to this new sensation  
Cause every day is like a revelation  
Just show me something i never knew about me yeah  
My friends can't lead me into no temptation  
Cause baby you'll give me everything i'll ever need  
Fooling you make a fool out of me  
(There's not a chance i'll take, Cos i will never have to fake it with you)

There is fuel in my fire, our fever burns high  
We're not scared of desire; it's a good thing

Girl you got me burning up  
got me burning up, burning up  
And i don't know how to stop, got me burning  
burning up,  
Girl you got me burning up, got me burning, burning up  
And i don't know how to stop, burning up, burning up

Loves the fuel in our fire, and it's taking us high  
I'm not scared of desire, it's a good thing
