

Gene Clark, Something About You Baby

Everything remained the same, unchangeable
No way for any broken dreams to mend
I took a long shot, bet my heart on you
And you showed me the way to fall in love again
There's something about you baby
That I just can't resist
There's something about you baby
Makes me feel like this
I was down, I was blue and lonely
And then you came along
There's something about you baby
We sing the same song
Each day will be a maze of absolute
With no one to fill up that time to spend
But all things pass and now that I see you
And you showed me the way to fall in love again
There's something about you baby
That I just can't resist
There's something about you baby
Makes me feel like this
I was down, I was blue and lonely
And then you came along
There's something about you baby
We sing the same song
