Gene Pitney, (In The) Cold Light Of Day

I've offered you all I have Just to spend my life with you (Just to be with you) But someone's got a claim on me These few hours will have to do So hold me tight, let's make this night last forever

Cos in the cold light of day, baby I'll be going on my way You're good for me, baby, but we met to late And I've got so much love to give And I've just got to learn to live Without you

How could we know the time would come When you and I would feel this way (Just to be with you) Love started as a playful thing Just turned out a different way So clock on the wall Please don't tick at all Just stand still

Cos in the cold light of day, baby I'll be going on my way You're good for me, baby, but we met to late And I've got so much love to give And I've just got to learn to live Without you

In the cold light of day baby I'll be going on my way (repeat 2x)
