

# George, Still Real

I wonder how long I can sustain this mystery  
I wonder how we thought we'd get here without strife  
I try to recall the beauty that brought us here  
And I cling to that, I cling to that, I cling to that for my life

They say they understand the turmoil that unsettles you  
And I say you just fulfill your end of the deal and I'll fulfill mine  
Once we reveal ourselves we're so quick, so quick to analyse  
I just want you to be free and enjoy this ride

So go on I'll tell you it's alright  
Go on, please tell me you're fine  
Don't ever let them get you down  
'cause everything that really, really matters  
is still real

I'd love to see you shine with every possible radiance  
And ignore any thoughts that weren't planted by good  
And let intention motivate and stimulate, that is all  
And let the cloud that hangs above drift off into the sunset night

So go on I'll tell you it's alright  
Go on, please tell me you're fine  
Don't ever let them get you down  
'cause everything that really, really matters  
is still real
