## Get Over It, Wrong Way

wrong way on a one way, street lights luminate this night. When we're here side by side, Each moment breathes new life. So get right, all that you like. Cause I know we share more than smiles, And all this down-time gives us reason to confide Everything I can fit onto one line.

Watch the sun set over wasted time
Wish upon a California sky
I think you know this time
I'm through with wasted time
And it may take one last night
What goes around comes back again in time.

Should I whisper our secret It ain't hard to see your heart would know. Its never easy to forget mistakes and afford some room to grow. In a heartbeat, on the heels of each soft word to break the quiet. I remember a season I forgot...and it fills me up with fire. I'll never fear the night, never fear the night with you.
