

Ghost Dance, Turn To Me (Live)

Like forever falling time just slips away
But I'd go through it all again if I could hear you say
Just one more time that you need me by your side
Say that I'm the one now, all you've gotta do is try

Don't you know one day
When all your friends are nowhere to be seen
You might need someone, well that's alright with me
I'll be here to walk you round whenever you're in need
Don't you know that you can turn to me

If you don't want to talk now I can understand
But if you wanna pour your heart out
I'll be close at hand
And if you call I'll come running to your side
And I'll keep coming back for more time after time

And whatever you say, I don't mind no
That's alright with me
One day you'll realise what desperation means
I'll be here to talk you down whenever you're in need
Don't you know that you can turn to me

I can hear you calling but you're so far away
Before you know it all that's left's the words we meant to say
There's no more time, no more time for us to waste
You know that I'm the one now
All you've gotta do is say

Don't you know one day
When all your friends are nowhere to be seen
You might need someone, well that's alright with me
I'll be here to walk you round whenever you're in need
Don't you know that you can turn to me
