

# Ghost Of The Robot, Dangerous

I don't think you know my name  
I think you'd leave me standing in the rain,  
You're a pretty little girl, got a thing for me,  
But you cut me open and let me bleed

Chorus:

But I'll be looking at you  
With your long brown hair  
Pretty little face  
Sparkling everywhere  
Looks so good  
When you come my way  
But I have to look down  
When you talk to me  
'Cause you're dangerous  
You're dangerous, dangerous  
And you don't even know it

One baby, two, maybe three more years  
You'll be a full grown baby, havin' all your curves  
And here's a little taste of irony,  
You'll be a town hot lady, too good for me

Chorus

So little girl you'd better stay set  
You play with fire when you get too wet  
So set me down and leave me be  
You find a devil and you unchain me.

Chorus
