

Ghost Of The Robot, Vehicles Shock Me

So you caught me all alone
Did you think I'd care at all?
Now I'm sitting by the phone,
Waiting for you to call.

It rang a million times before I picked it up
I wear a stupid smile saying now I'm stuck
The effervescent beauty of her face, so thin,
All these stupid questions, well they did me in.

Who was I to think to tell?
You drove a 2-0-0h?
Fake plastic trees are dead,
Have a good time when you fall.

It rang a million times before I picked it up
I wear a stupid smile saying now I'm stuck
The effervescent beauty of her face, so thin,
All these stupid questions, well they did me in.

Everything is upside down
Everything is over now

It rang a million times when you lied to me
It rang a million times when you lied
It rang a million times
It rang a million times oh
It rang a million times
It rang a million times

It's your birthday and I'm not there
Because you don't even know I'm here
Fake trees you plant behind you
When it's me there right here beside you.
I'm the shade that creeps your shoulder
Why let's hide your face from me now.

Can't get over
Can't get under
Can't get round or through to you I...
Can't get over
Can't get under
Can't get round or through to you
Everything is over now.
