

# Ghoti Hook, Expect

No take backs  
No matter how long until this ends  
The longer this season  
The harder the steps to forgive  
What I want I know I can't have  
You played it safe now you wish she had  
I'll take the time to mention  
I hope to stick around  
You made your name for me  
Despite your joy and pride

Condescend me don't let me down  
I know you can  
Ask me a question to prove to you  
I'm not a man  
What I want I know I can't have  
You played it safe now you wish she had

I'll take the time to mention  
I plan to stick around  
You play your games with me  
By now I'm not surprised

All the love I have is failing for you  
So please stop pushing me  
Into this small box that you have made  
I will not go I'm not the same

What I want I know I can't have  
You played it safe now you wish she had  
I'll take the time to mention  
I plan to stick around  
Don't act so surprised  
You made your name for me
