

Giant, No Way Out

Sometimes love feels like an empty room
It's cold and silent, you got nowhere to go
And sometimes the feeling's over way too soon
'Til you find someone who tells you so
And don't you know, you're my reason for tomorrow

Chorus:

And I need you, now until forever
All my life I've waited for someone like you
Love won't die if we put our hearts together
You and I can make this dream come true
Now until forever

I need you

We thread emotions to be strong enough to withstand all elements of time

When we're together where there's only love

Never felt a heartbeat so close to mine

Don't you know you're my reason for tomorrow

chorus

It's our love, a love that lifts us high enough

We can survive any storm, where no one's ever been before

And tomorrow will be brighter now, even yesterday is new

And all our promises ring true, and everything I have, I give to you

(Instrumental break)

Sometimes love feels like an empty room, but now that all seems oh so long ago

chorus repeats out
