Gigi D'Agostino, Silence (extended)

Stay with me forever Sharing love together Keep my dream alive Touch with me the sky

Is got to be the reason Share with you my freedom Steal a ray of sun While I'm here with you You must come along Everywhere I go I just want to love you so

To fall in love with you I never ever played I just want to say hello It takes so long to draw From every where I go I just want to love you so

To fall in love with you I never ever played I just want to say hello It takes so long to draw From every where I go I just want to love you so
