

Ginuwine, World Is So Cold

The world is so cold
Why did you leave me standing there
Alone in my shadow
Looking for your presence
But it's not there
[Repeat]

One thing's on my mind
The thought is having you
To have you next to me
That's where you want to be, baby
You're a diamond, you're my world
Tell me where did you go, baby
How could you leave that night
And leave me all alone
Already the world is so cold

[Chorus]

I'm lost and all alone
No doubt I'm miserable
Got much good love to give
Alone's no way to live, baby
You made me feel so whole
And now I've broke apart
I can't believe you're gone, baby
It tore apart my heart
The world is so cold, baby

[Chorus]

(why did you leave me)
(I've never done anything to you, why did you leave me baby)
(ooh)
(There's already pain in my life)
(I didn't need no more from love)
(Now you've given me ?)

Yes you did

(why did you leave me)
(I've never did anything wrong to you)
(why did you)

The world is so cold
I miss you
The world is so cold
I love you
I don't understand why
What I've ever done to you
