

# Gloria Estefan, Close My Eyes

If I could just close my eyes  
See just what I wanted to see  
It would be much easier to live this life,  
Thinking that it never really comes down to me

Sometimes I wanna close my eyes  
So I can't see time while it's slipping away  
We're all walking a very fine line  
Until reality is somehow thrown in our face

Bury it deep and maybe you won't feel the pain  
But you can't let it go  
Down the line it will be back again

If we could all close our eyes  
To all the things we know that are wrong  
We could live selfishly protected lives  
Not even thinking about what we could have done

Say it's not there and maybe it will go away  
But the thruth is it won't  
Down the line it will be back again

Anf rather than examine it  
I think I better handle it  
What good is it to close my eyes  
Or tell myself another lie  
Gotta get along somehow and sometimes it's easier

Sometimes I have to close my eyes  
And let you think you can make a fool out of me  
But I set myself up each time  
By trusting you so openly

But that's the way I wanna be,  
That's the way I wanna be ...
