

Gloria Estefan, What Goes Around

We go around lie to one another
Without a second thought
Don't think we're foolin each other
Like this we can't go on
No respect or consideration,
Where has your conscience gone
Take a step in the right direction
Or this won't last too long

What goes around comes around
You got to stand your ground
Be careful what you say or do
Whatever goes around comes around

Once again you got away with it
Are you happy now
Watch your mouth,
Don't put your foot back in it
Gets back to you somehow
I must say you tell a good story
Of things I know ain't true
You turn around and say you're sorry
With a straight face attitude

What goes around comes around
You got to stand your ground
Be careful what you say or do
Whatever goes around comes around
What goes around comes around
You got to stand your ground
No matter what road you take
Whatever goes around comes around

Don't you underestimate this girl
You will only fool yourself
Are we gonna live with this
When there's no much at stake
There's no way we're gonna make it
A change is overdue
Live and learn to love one another
It's all up to you

What goes around comes around
You got to stand your ground
Be careful what you say or do
Whatever goes around comes around
