

God Module, Victims Among Friends (Resister Mix)

Don't think you know me
Not everyone is who they seem to be
Do not trust your instincts
Or the words you read
Or faces you see
Start sleeping with the light on
The things you see are far beyond doubt
You don't need your eyes anymore
Open them to see me rip them out

No symptoms can describe this fracture that I feel
I'm the enemy in the end
A victim among your friends
You still want to see
Some worth hidden inside of me
Don't fool yourself again
You were my victim not my friend

No symptoms to describe
This nothing that I feel inside
No soul to leave me paralyzed
You were never my friend
An emptiness only I can see
To me its a gift not a disease
Want me to hurt you just say please
I was never your friend

No symptoms can describe
This fracture that I feel inside
I'm the enemy in the end
A victim among your friends
You still want to see
Some worth hidden inside of me
Don't fool yourself again
You were my victim not my friend

You were never my friend

I was never your fiend

No symptoms to describe
This fracture that I feel
I'm the enemy in the end
A victim among your friends
You still want to see
Some worth hidden inside of me
Don't fool yourself again
You were my victim
Not my fucking friend!

I was never your friend
