

Golden Smog, Friend

(Johnson)

You took me down when I was there

You shot me down, like you didn't care

You only, the only simple wish you only wish, was born a prayer

For a friend

You toss and turn in your bed alone

You throw abuse through a telephone

Why don't you sit back relax, sit back and let your feelings go

With a friend

Chorus:

Can't you let it go

Oh, it aches you so

Got to let it go, let it go, let it go, let it go

On new years eve, you had it all

A new year came, and I watched you fall

You only plan was for a man, you only plan was for a friend

Just a friend

(Chorus)

I can't believe

The things you can't see

You're never wrong, you're always right

You're never wrong, you're always right

You got me wrong

(Repeat)

You're never wrong, you're always right

You're never wrong, you're always right

You got me

(Verse 2)

With a friend (*3)

Friend (*2)
