

Goldie Hill, Fallen Angel

If I'm a fallen angel you can't blame me for it all
If I'm a fallen angel you're the one who made me fall

Another fallen angel that's what you call me now
Because you see me out each night breaking every vow
You took my love for granted you're lonely constantly
And that's the only way that I can hide misery
If I'm a fallen angel...

[guitar]

So many times I told you I couldn't take much more
Do you remember how you laughed and walked right out the door
The only way that I can stop my tears before they start
Is go the way of other girls who have a broken heart
If I'm a fallen angel...
