

Goodnight Electric, Dizzy

I'm walking all around the city
Guided by feeling so happy
Oh dizzy, hairy and daisy
And This is what I wanna be
We play with bees in the garden
We are making it happen
Unfilled your face, we laugh together
It's touching me

I've got to start a day
Got to start it with you
Everyday had a something new
I've got to find it some way
Got to find it with you
Everything's gonna be me and you

You sing our song and I remember
When first time we loved each other
You are acting like you are a monster
It's funny
And drink some milk will be better
I'll wrap your finger forever
Your voice so warm and whisper
You hugging me

I've got to start a day
Got to start it with you
Everyday had a something new
I've got to find it some way
Got to find it with you
Everything's gonna be me and you

In this Sunday - I see you
I feel so high - And dizzy too
Drugs are plain - you're in my tune
Apple tree - they're not so blue
I'm standing here - with a clue
Bring those flowers - oh it's so you

I've got to start a day
Got to start it with you
Everyday had a something new
I've got to find it some way
Got to find it with you
