

Goodnight Electric, Versus

I know someday you and me
Gonna kick you and gonna kick me
Everyday life's so happy to me
A couple of monsters wanna be
You put something on our show
Toxic conversations run and go
Left a disease and you amaze me
I wanna keep me in custody
Happy happy robo versus Godzilla
There is nothing left to bring
I drown, you jump, and we start to sing
I collect the ruin that you broke
So this is a totally joke
We've got something in our live
Sense of killing and automatic mind
We're going to far and it's absolutely war
Overload and deserve to die
We are over
Finally over
