## Goon Moon, Built In A Bottle

Peel the foil off the windows Let the sunlight shine through I can't get out of the bottle Built like a ship inside

Lying quiet on a runway Waiting for the earth to move I created me a monster Now's he's after me tonight

I hope you left the light on My food is rotting in the fridge All that's left is crusty mustard Nothing left but the flies

Lying quiet on a runway Waiting for the earth to move I created me a monster Now he's after me tonight

Back when I was squeezing pimples Screaming angry at the world It takes a lifetime to become No one's left to watch the storm

Celebrate the birth of Jesus Late December early morn I hope you left the light on Share all your grief with you

Lying quiet on a runway Waiting for the earth to move I created me a monster
