

# Graham Colton Band, Telescope

Up here alone in this room  
Watching you come into view  
Off in the distance where I want you to stay  
Can't get you out of my mind  
I'm tired of passing the time  
I've got your picture and all I can do is try to look away

(chorus)  
You're in my telescope  
You don't wanna get too close  
It's easy to stay where you feel safe  
You circle around at night and shine like a satellite  
It's easier when you're far away

You disappear in the crowd  
I scream but don't make a sound  
I never know when you might come back again

So close but don't let me in  
You still get under my skin and it's showing  
And all I can do is try to look away

(chorus)

I'm a fool for every move  
For coming back to you  
I'm a fool afraid of love

You're in a telescope  
You don't wanna get too close  
It's easy to stay where you feel safe

(chorus)
