

Grant Lee Buffalo, Where Do We Go From Here

Whatever happens to the plans we lay
Seems like we've watched them all go south
And I done lost count of the mistakes I've made
Just tell me it isn't too late now

Where do we go from here
Where do we go from here
Where do we go from here my friend

Whatever feelings you still have for me
I wouldn't want to see them wane
It hasn't all come to us easily
But I wouldn't change it just the same

Where do we go from here (where do we go from here)
Where do we go from here (where do we go from here)
Where do we go from here my friend

It's comin' out wrong once again
It's comin' out wrong once again

Maybe your timin' it just wasn't right
Maybe the sky was over-cast
Maybe the fruit was fallin' 'fore it was ripe
Maybe we just weren't built to last

Where do we go from here (where do we go from here)
Where do we go from here (where do we go from here)
Where do we go from here my friend

Where do we go from here (where do we go from here)
Where do we go from here (where do we go from here)
Where do we go from here my friend

My friend
Where do we go from here
Where do we go from here
Where do we go from here
