

Grave Digger, Paradise

Planet is so sweet
Like you never see before
And the stand of the crown
Licks on I day I shall return

Cold side of the war
Try to your life are never know
And the night rests of lie
By the times you never no time

Living in the paradise
See burning life

On night blow and go
Wish I never want forget
Silent day through inside
Feel the sky scared blaze

When is no lying true
Because the fate in the world
Only men trying to keep
On the time can never heal
