

# Gravity Kills, Enough

I love the thrill, I love the scene  
Imagine you in the white light  
So beautiful, you watch me bleed  
You're stabbing me from inside now

Kneel down and tell me about your world  
Tell me something that I don't know  
You know nothing about the world around you

(Chorus)

It's not enough - broken in two  
It's not enough - speaking the truth  
It's not enough - watching me bleed  
It's not enough - torn in between  
It's not enough

I'm watching you, distorted view  
So beautiful in the white light  
It's make believe, all that you see  
It's haunting you from inside now

Kneel down and tell me about your world  
Show me something inside your world  
You know nothing about the world around you

(Chorus)

Sometimes in me, you are the seed  
A dying need in the white light  
The simple truth, it speaks to me  
It's screaming out from inside now

Kneel down and tell me about your world  
Tell me something that I don't know  
You know nothing about the world around you

(Chorus x 2)
