

Gravity Kills, Suffocate

Let 'em eat you till you're bleeding
Only let them see you scar
Violated, penetrated
Pushing your head under

Take one pill to make you sane
Another one to take your life
One you never take
One will break you down

Suffocating all for nothing
Suffocating all the same
Suffocating like you want to
Like you want to like you want to
Suffocate

Contemplating dirty play thing
Looking through a blind man's eye
What I'm born to, needle torn through
Now the hole is gaping

I will always be insane
Say a prayer for me tonight
Standing in your way
Let it break you down

Suffocating all for nothing
Suffocating all the same
Suffocating like you want to
Like you want to like you want to
Suffocate

The first time is make believe
The last stone is cast for me
You can't tell me what I am
I won't take the master plan
When you prostitute yourself
Hands reach but no one helps
Mouth open you can't breath
The last one to fall is standing

Take you with me while your heart just fades to gray
Stop your shaking, all the time you're wasting

Suffocating all for nothing
Suffocating all the same
Suffocating like you want to
Like you want to like you want to
Suffocate
