Great White, Fast Road

(Kendall, Russell, Niven, Black, Desbrow, Lardie) Leavin' here on a goodbye road been holdin' on for too long One way out still open to me just be a rock rolling stoned City lights, summer nights the modern day call of the wild Faces come, the faces go all looking for someone to be I don't mind. I do fine There's nowhere that I'd rather be On a mainline fast road to nowhere A straight line fast road to nowhere Don't you cry, baby don't ask why and what does this all mean to me Sometimes it just seems to be we all have need to break free I don't mind. I do fine There's nowhere that I'd rather be On a mainline the fast road to nowhere Take me along for the ride of no return There's fire in your eyes and fire in the heat of the night
