

Green Apple Quick Step, Ludes & Cherrybombs

Live from space
Perfect direction
Indicating science fiction
Dinosaurs bigger than buildings
Billions of cells mature
Rape a monkey from big planet blue
Someday I hope to see you
Where are you from
From the world of sulex
I can't believe you're not a realist

In a world that's trying
And I'm finally finding that
You should zip off your skin and try to
Peel away hairless skin from the alien
Peel away hairless skin from the alien

As we stepped out onto moon
Somebody tell me how to breathe
So different from my home
I've been waiting so long
For you to come undone

Mechanically so inclined
Fit the pieces using gasoline

Now it's time light to light the fuse
On the cover weekly news
Years have passed future's confusing
Field of circles unexplained
Eyes are shrunken in the back of her head
Pin prick a nuclear bed

In a world that's trying
And I'm fanally finding that
You zip off your skin and try to
Peel away hairless skin from the alien
Peel away hairless skin from the alien
Peel away hairless skin from the alien
Peel away hairless skin from the alien
As we stepped out onto our moon
Somebody tell me how to breathe
So different from my home
I've been waiting so long

As we stepped out onto our moon
Somebody tell me how to breathe
So different from my home
I've been waiting for so long
For you to come undone
