

Guster, I'm Through

I looked down and I didn't know what to think
Vapor trails from the engine of this plane
Shut my eyes and I flew right from this place
Made a wish and I blew it all away
Then I was alone
Then I was alone

Right now the sun fills up the sky
And waves of color beat in time
Tell all my friends I'm seeing them again
I'm on a great divide
There is no doubt, I'm never coming back
The story of my life

I was down and I did not understand
Was afraid couldn't wash it off my hands
So I rose and I flew right from that place
Got my wish that I'll never be the same
Then I was alone
Then I was alone

Right now the sun fills up the sky
And waves of color beat in time
Tell all my friends I'm seeing them again
I'm on a great divide
There is no doubt, I'm never coming back
The story of my life
Now I'm fine

I'm through
I'm through
I'm through

Then I was alone
Then I was alone
But it won't be long
But it won't be long

I'm through
I'm through
I'm through
