

# Haemorrhage, Expectorating pulmonary mucus-purulence

Consumed cartilage, absorbed mucous membrane  
Internal Haemorrhage flowing from your airways  
Desperately you gasp - ripping vocal cords  
A repulsive sound - crepitating snore  
Cavernous stertor ... Agony concerto

Phlegms plug your larynx  
expulsed as you cough  
Severe bronchitis  
A thick mass of mucus  
Gargling in your throat  
Bloody haemoptysis

Lungs collapsed  
Frenzied gasp  
Expectorating mucus-purulence...  
Painful breath  
Rhythmic snort  
Expectorating mucus-purulence...

Profuse vomica  
Retching and disgorging  
(Respiratory wound)  
Dilated pneumothorax  
Oppressing diaphragm  
Slow suffocation

Viscous congestion - Pulmonary edema  
Asthmatic asphyxiation - Rupturing emphysema

Lungs collapsed  
frenzied gasp  
expectorating mucus-purulence...  
Painful breach  
rhythmic snort  
Expectorating mucus-purulence...

Decomposition...  
"Pathologist disconnect the scanner  
... Patient is finally dead"
