

Hale, Eyes Wide Shut

Eyes wide shut, stuck conscious
I can't sleep 'cause I'm with you
I can feel your skin go through my soul
While yours is somewhere else

But you, you never saw me there with you
No you don't have a clue

Eyes wide shut, action cut
I can't sleep 'cause I'm with you
I can feel your skin go through my soul
While yours is somewhere else

But you, you never saw me there with you
No you don't have a clue

All I have is all I need but all you want is all I'm not
And you can't see that all I'll be is someone who just loves you when you're there

All eyes can see through
May you bet things can't go wrong while you're with me

But I lie

All I have is all I need but all you want is all I'm not
And you can't see that all I'll be is someone who just loves you when you're there
