

Handsome Devil, Tonight

Evening's upon us, and we're all alone
Fear and denial down to the bone
I'll give you my heart girl, Baby hold on
I want to be near you when they drop the bomb

CHORUS

Tonight could be the last night of our lives
Don't waste no time all right
We can kiss before we die, Baby

This kind of shelter can save us from rain
But doom is impending, I'll say it again
Love is our fortress, a beautiful place
I want to hold you, and stare at your face
They say that we're all fools
They don't understand We're all going down together
In a Crash, Boom Bang

CHORUS

If it wasn't doomsday, I'd still feel the same
There's something about you,

It's makin me stay
I want to share girl, I want to give
But without your loving, I don't want to live
