Hardline, Hot Cherie

Been too long since the last rain Still the stars sizzle hot in the sky And there, undressed in the shadows Stands my sweet Cherie hiding from July

And all night you kept me up, up all night Hoping that I could make you mine

[Refrain:]
You're getting me hot, Cherie
I want what you've got all over me
Isn't my love strong enough
I'm ready to rock you long and rough
You're getting me hot, Cherie
I want what you've got all over me
I'm going crazy

I can't wait for October When the breeze from the lake, she's blowing cold Well maybe she'll need me for some shelter When the campfire dies and the tall tales have been told

And all night I've been working overtime Hoping that I could make you mine

[Refrain]
